

Özer Gökalpsezer

Frontend-Focused Full-Stack / Product Engineer

İzmir, Turkey · ozergokalpsezer@gmail.com · [+90 553 441 50 45](tel:+905534415045) · ozergklp.com · [GitHub](#) · [LinkedIn](#)

Frontend-focused full-stack/product engineer with **2+ years of experience** building React/TypeScript apps, SaaS products, and developer-facing UI. Shipped products for **5,000+ active users**, built a **200+ user** full-stack SaaS, and authored open-source React libraries with **130+ GitHub stars**. Strong in **ownership, component architecture, UX quality, and end-to-end delivery**.

EXPERIENCE

Frontend Engineer

90pixel · Hybrid

Feb 2024 – Mar 2026

- Owned frontend architecture for **5,000+ active users**, improving reliability and helping extend the contract
- Built scalable UI patterns with Next.js, React, TypeScript, Mantine, and RTK Query
- Implemented **secure file uploads** with chunking, validation, progress, and failure states
- Shipped advanced filtering with debounced search and dynamic query building
- Created reusable components with consistent tokens, accessibility standards, and maintainable APIs

Software Team Lead

GDG on Campus Yaşar University

Sep 2024 – Apr 2025

- Led frontend curriculum and **hands-on workshops for 80+ students** on React and workflows
- Mentored teams on code organization, product thinking, and shipping projects
- Organized hackathons and developer events for aspiring developers

SKILLS

Frontend: TypeScript, React 19, Next.js 16, Tailwind CSS, shadcn/ui, Radix, TanStack Query, Zustand. **Backend:** Node.js, Next.js Route Handlers, Drizzle ORM, PostgreSQL, Better Auth, Zod, REST, serverless. **Infra:** Vercel, AWS Lambda, S3, Polar, Stripe, Resend. **Tooling:** Bun, pnpm, Turborepo, Vite, Vitest, Playwright, Git.

SELECTED PROJECTS

code2clip

Product · 200+ Users

[code2clip.app](#) →

A full-stack SaaS that turns code snippets into animated short-form videos, serving **200+ active users**.

- Architected a **200+ user** SaaS with Next.js 16, React 19, Neon, Drizzle, Better Auth, and Polar
- Built serverless rendering with Remotion, **AWS Lambda**, **S3**, parallel jobs, and HMAC webhooks
- Shipped usage-based billing, tiered quotas, async progress states, and programmatic SEO

react-beautiful-color

Open Source · 74 Stars

[GitHub](#) →

A **composable color system** for React with format-preserving state and a unified conversion engine.

- Built a format-preserving color model with predictable state and clean developer APIs
- Built a **bidirectional conversion engine** with precise edge-case handling

hiraki

Open Source · 55 Stars

[GitHub](#) →

A **headless drawer system** with gesture recognition and a physics-based interaction layer.

- Built a **gesture engine** with velocity tracking, direction detection, snap points, and physics
- Designed a composable API based on headless UI patterns for flexible interfaces

EDUCATION

B.Sc. Computer Engineering · Yaşar University · Full Scholarship · June 2025
